Alma Mater

Hail to Thee, our Alma Mater! Ever shall we praise Thy name, As we learn and live together In the glory of Thy fame.

Through the years that we are with Thee,

Thou shalt be our Guiding Light.

We will try to earn Thy blessing, We will strive to do the right.

When we leave to do life's bidding,

True to Wentworth we shall be Trusting God to guide us onward,

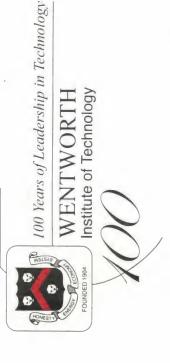

Knowing not our destiny.

Refrain

For our school days, here at Wentworth,

We shall have sweet memory. To our Wentworth, Alma Mater, Ever loyal we will be. ... Ashlyn M. Huyck

COMMENCEMENT 2004

Summer Convocation

Saturday, August Fourteenth, Two Thousand Four The 100th Year of the Institute

WENTWORTH INSTITUTE OF TECHNOLOGY Boston, Massachusetts

WENTWORTH INSTITUTE OF TECHNOLOGY

Founded by Arioch Wentworth in 1904

On April 5, 1904, Wentworth Institute was chartered for the purpose of "providing education in the mechanical arts" as instructed by the will of Arioch Wentworth, who died in 1903. Arioch Wentworth was a working man who earned his fortune in the marble business and in real estate. It is said that he had unusual mechanical ability, but as a young man he was unable to find employment in this area because of his lack of special training. Thus, his interest in providing opportunities for training young men in the mechanical arts was born.

By 1909, the trust income from his bequest had generated enough money to commence construction of the first group of buildings on a parcel of land purchased the previous year at the corner of Huntington Avenue and Ruggles Street in Boston. On September 25, 1911, Wentworth Institute officially opened with an entering class of 224 day students and 467 evening students.

From the outset, both day and evening courses have been offered. The former originally consisted of one-year apprentice courses for young men desiring to become skilled workmen and two-year courses for those wishing additional practical experience in preparation for positions as superior workmen, master mechanics or foremen. The evening courses were intended for those already employed in the industry, and planned to increase their efficiency in present occupations or to aid in advancements. Courses of instruction included carpentry and building, electrical wiring, plumbing, machine work, pattern making, foundry practice, machine construction and tool design, and electrical construction and operation.

Since 1911, the charter has been amended several times. In 1956, the power to award associate degrees was granted by the Commonwealth. In 1970, Wentworth College of Technology was chartered to grant Bachelor of Science in Engineering Technology degrees. In 1977, the charter was amended to reflect the merger of Wentworth Institute and College into Wentworth Institute of Technology. In 1984, the charter was amended to authorize the Institute "to grant degrees at the associate and baccalaureate level in fields of science, engineering and technology." Since 1909, the campus has expanded to over 35 acres, and enrollment has expanded to over 3000 full and part-time students.

THE ORDER OF PROCESSION

directly in front of Watson Hall's Quadrangle door. The raised baton signifies that the Commencement Convocation is about to begin. As the Processional music of the Aleppo Temple Pipe Band begins, the procession will file in and the audience The Academic Procession is presided over by the Institute Marshal, who stands should rise and remain standing until after the Invocation.

The candidates for the degrees will march in two lines. The Faculty, Alumni, Platform Party and President will then follow. At the conclusion of the ceremony, the audience will rise for the Alma Mater and Benediction. Graduates should immediately proceed to Watson Auditorium for diploma distribution.

Graduates are invited to utilize the stage for picture taking after the ceremony.

PRESENTATION OF CANDIDATES

The candidates for associate and baccalaureate degrees are presented by the condemic Professional and Continuing Studies Division Head department and division heads.

JOHN B. GRAY

John B. Gray, today Wentworth honors you for a lifetime of leadership accomplishments in the civic, educational and business communities, and for your advocacy for quality technological education.

In 1945, you enlisted in the U.S. Marine Corps, and later that year you entered Harvard University. In early 1946, you went on active duty to China, where you served until the end of that summer before returning to Harvard. You graduated in 1949 with a Bachelors degree in Political Science. You remained at Harvard to earn your MBA with a concentration in Manufacturing in 1951. That same year you began your forty-year career with Dennison Manufacturing. You served in numerous financial, production and general management positions before becoming Corporate Vice President and Director in 1968, and Senior Vice President in 1972. In 1979, you were elected Executive Vice President, and in 1985 you were elected President, a position you held until your retirement in 1990, when Dennison Manufacturing became a subsidiary of Avery Dennison Company. You served on its Board of Directors for another year.

You have been Director of the State Street Bank Corporation, Liberty Mutual Insurance Company, E.G. and G. (now Perkin-Elmer), Stackpole Corporation and the Reece Corporation. You have also served as Trustee of the New England Aquarium, the Regional YMCA, New England Shelter for Homeless Veterans and Executive Service Corps. You were also a Selectman in the town of Dover, Massachusetts. You are currently an active board member of the New Bedford Whaling Museum and the Lloyd Center for Environmental Studies.

In 1979 you were appointed to Wentworth Institute of Technology's Corporation and then elected to its Board of Trustees in which you have actively served on since 1991. As a Trustee, you have devoted much energy and time to serving on many of the Board's Committees, however your stewardship as the chair of the Board's Development Committee has been exemplary. As a Trustee, you have encouraged and supported Wentworth's efforts to expand its academic program offerings into architecture, engineering, and management and to help transform Wentworth into a nationally recognized residential undergraduate institution. Through your leadership, professional advice, and personal support, Wentworth has increased its endowment, expanded its traditional "hands-on" laboratory and studio programs, and provided affordable undergraduate technical education. As Chair of the Development Committee, your leadership and involvement has guided many of Wentworth's activities to expand programs to its alumni, increase alumni giving and participation in the Annual Fund, and provided valuable insights and ideas for the Centennial Campaign.

Iohn B. Gray, for your many contributions to business, education and society, Wentworth is proud to honor you with the degree of Doctor of Engineering Technology, *banaris causa*.

CAROLE C. WEDGE

Carole C. Wedge, today Wentworth honors you for your many accomplishments within the architectural profession, in particular your leadership and advocacy on issues related to sustainable design and promoting diversity within the design professions.

In 1981, you earned your Bachelors in Environmental Design from the University of Colorado. You studied at the Alliance Francaise in Paris before earning your Bachelors in Architecture from the Boston Architectural Center in 1990. After three years at J&W Seligman & Co., you began your career at Shepley, Bulfinch, Richardson and Abbott. You were an Associate for two years before being promoted to Senior Associate in 1998, and then Principal in 2000. In 2001, you became a Director, and in 2004, you were elected President, a position you hold today.

While at Shepley, Bulfinch, Richardson and Abbott, you have been a planner and architectural designer for academic buildings in higher education, such as libraries, law schools, business schools and campus master plans. Your clients have included Cornell, Dartmouth, Georgetown, MIT, Princeton, Harvard, Tufts and Wellesley, as well as Queen's University Belfast in Northern Ireland. You also have project experience with Dana-Farber Cancer Institute in Boston, Perkins School for the Blind in Watertown, MA and the United Nations in New York City. You have explored the convergence of Icarning, teaching and research environments, and have been one of the firm's leading proponents of "green design" with a commitment to the principles of sustainability. You have played a key role in the firm's continuing excellence in design and continued high quality of service. In addition, you have led efforts to bring more women and minorities into the architectural profession, and to your own firm.

Your professional affiliations include the American Institute of Architects, American Library Association, Association of College and Research Libraries, Boston Society of Architects and the Society of College and University Planners. You hold a certificate from the National Council of Architectural Registration Boards, and are a registered architect in 9 states and Washington DC. In 1999 you were invited to speak to academicians, architects, interior designers and facility managers on "Planning the Academic Library for the 21st Century" at the Boston Society of Architects' Annual Conference at Build Boston. That same year you were the keynote speaker at Wentworth Institute of Technology's Academic Colloquia day, entitled "Envisioning the Academic Library", where you and several college library specialists led discussions on the future of the college library, including issues of digital libraries.

Carole C. Wedge, for your leadership and accomplishments in the design community, and your efforts to expand opportunities for women and minorities in the design professions, Wentworth is proud to honor you with the degree of Doctor of Engineering Technology, honoris causa.

THE COMMENCEMENT CONVOCATION

The pageantry of the Commencement Convocation ceremony had its beginnings in the Middle Ages, when universities were founded in Europe.

Gowns were worn as protection against the cold, under a cloak, often with a cowl or hood attached. This attire evolved into the style of gown and hood worn today. The academic regalia - cap, gown and hood - descended from medieval dress.

tarboard usually has a black tassel attached. A gold tassel signifies a doctoral degree, book or perhaps the quadrangle shape of the Oxford University campus. The mor-The origin of the cap is more obscure. The mortarboard is the most common style and appeared in the sixteenth or seventeenth century. Its shape may represent a and at Wentworth signifies academic honors.

United States. Currently, caps and gowns are worn only for important ceremonies in United States universities, such as commencements and inaugurations, and have dis-Today, in some English universities, gowns are everyday wear for both students and faculty, in class as well as at other university functions such as during final examination week. Students wore caps and gowns until the Civil War in universities in the appeared altogether in some European countries.

adhere to these standards. Each scholar is attired according to his or her educational Commission in 1894. With few exceptions, and some revision, today's colleges still The design of academic regalia was standardized by the American Intercollegiate background.

sleeves. Doctor's gowns are faced down the front with velvet and have three bars of Associate's, Bachelor's and Master's gowns can be distinguished by the style of their velvet across the sleeves.

Wentworth; while the colors of the border indicate the academic discipline, as follows: The hood is the most interesting part of the academic costume. The color of the hood lining indicates the university that granted the degree-black and gold for
